

SafeMask Classics

Procedure Earloop Face Masks

Meet all your daily needs with a single line of masks.

You need reliable respiratory protection that is breathable and comfortable, even during the longest procedures. That's why every earloop face mask is made of quality materials that provide the ASTM level protection you need without the gaping, discomfort or irritation often caused by lower-quality masks.

Available colours: ● ● ● ●

VERSATILITY TO MEET ALL YOUR DAILY NEEDS

Shingle pleat design

Prevents fluid pooling and cross-contamination

High-quality materials

Provide reliable protection without compromising breathability

Adjustable nosepiece

Ensures a comfortable, customized fit

Soft, stretchy earloops

Prevent pulling and irritation

- **Non-woven spunbond polypropylene outer layer** provides maximum protection against fluid penetration.
- **High quality media** ensures optimal filtration and breathability.
- Non-woven spunbond polypropylene **inner layer** is made of dye-free material that will not lint or tear during use.
- Ample length **earloops** are soft, strong, ultrasonically sealed and attached to the outside of the mask to prevent pulling and irritation.
- Adjustable, **enclosed plastic-covered iron nose piece** provides customized protection and comfort.
- **Shingle pleat design** prevents fluid pooling and cross contamination.
- Available in all **3 ASTM levels**.

VersaGown Agile

with Flexneck Plus and TieFree technologies

THE ULTIMATE GOWN FOR OPTIMAL COMPLIANCE

The new VersaGown Agile with Flexneck Plus and TieFree technologies instantly helps increase compliance and reduce cross-contamination.

VERSAGOWN AGIL INNOVATIVE DESIGN PROMOTES INSTANT INFECTION CONTROL COMPLIANCE

When it comes to providing healthcare professionals with optimal protection, the Medicom team never stops innovating.

QUICK, EASY DONNING

Double elastic closure creates the widest head opening of any gown on the market

Tie-free donning saves time when every second counts

Designed using clinician feedback and independent clinical testing

RELIABLE COVERAGE AND PROTECTION

Meets ANSI/AAMI PB70 Level 2 requirements for liquid barrier performance

Overlapping back for complete coverage

Thumb loops prevent sleeves from riding up

Proven to significantly improve compliance versus standard gowns

IMPRESSIVE COMFORT

Highly breathable material keeps wearers cool and comfortable

Innovative design allows freedom of movement without compromising protection

Neither fabric nor elastic neck closure are made with natural rubber latex

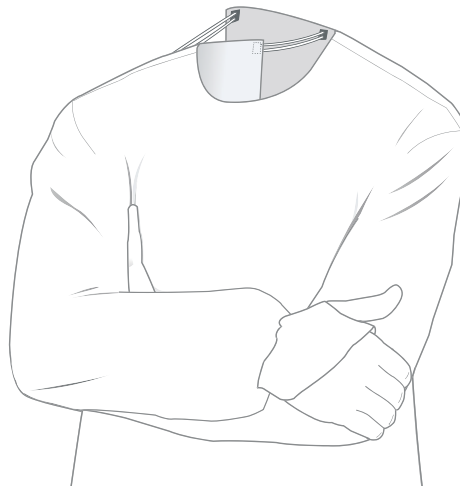

QUICK, SAFE DOFFING

Allows gown to tear away from the body in a safe and controlled manner to help prevent cross-contamination

Proven to significantly reduce the risk of cross-contamination versus standard gowns

FEATURES

1. Patented Flexneck Plus™ technology with double-elastic neck closure
2. Ultrasonically sealed seams
3. Flexneck™ technology allows for controlled breakaway
4. Elastic cuffs with thumb loops
5. Smaller thumb hole than standard gowns

BENEFITS

1. Allows fast and easy donning when every second counts
2. Prevent tearing during donning/doffing
3. Significantly reduces the risk of cross-contamination during doffing
4. Prevent sleeves from tearing and riding up
5. Increased palm coverage further reduces skin exposure versus traditional gown designs

Like you, we never compromise. We use carefully selected materials and engineer our products to offer protection you can count on. We have been providing peace of mind to healthcare professionals for over years. We take pride in the protection we offer, so you can take pride in yours.
